As a result, the Windows registry and Start menu/screen are not going to suffer any changes, and there will be no leftover files after its removal. Aside from that, if you copy the aforementioned files to a removable storage unit (e.g. USB flash drive), you can use the utility on any computer you can connect to. The interface is characterized by simplicity, as it only contains a button and two boxes, one of which enables you to input an URL, while the other displays the corresponding IP. URL 2 IP Portable is a tiny tool which was developed specifically to help individuals find out the IP address of all URLs you can think of. This is the portable version of URL 2 IP - which means the installation process is not a necessity.

Another important aspect to keep in mind, is that you can easily copy the program files to any location on the HDD and double-click the EXE in order to launch URL 2 IP Portable.
